(54) Title: DIRECT CONNECTION MANIFOLD FOR RECIPROCATING PISTON PUMP

(57) Abstract: An airless sprayer utilizing a reciprocating piston pump (12) uses a block fluid manifold (16) attached directly to the pump cylinder (14) and which includes provisions for a pressure sensor (20), a dump or safety valve (18) and a hose outlet to minimize pressure drop which in turn maximizes spraying pressure as well as lessening the tendency to pack out.
